PKI Consulting

Get IT Right the First Time

🎯 What is it?

Our Public Key Infrastructure (PKI) consulting services provides the practical advice and technical expertise to help secure your applications in the most cost-effective way.

With extensive experience and in-depth domain knowledge, from strategic high-level governmental initiatives to real-world PKI implementations and adoptions, we have been trusted to provide this service to numerous government organisations worldwide.

Our service also includes setting up critical infrastructure supporting PKI, such as Certificate of Authority, Registration Authority and other Key Recovery options.

Mostly importantly, we work closely with you to develop strategies to ensure that your PKI implementation is commercially viable and carried out in a cost-effective and timely manner.

🎯 Key Features

Strategic Review

We provide a thorough review and analysis of your organisation's current PKI scheme and recommend an appropriate strategy that is localised to your operational needs and ensure global best practices are capitalised.

Consultancy Service

We use industry-proven methodologies and technologies to develop an optimised PKI design to cater to your business and operational requirements. We also help to formulate Certificate Policies and Certificate Practice Statements, which include business cases, legal liabilities and certificate operations such as handling of certificate requests, user identity verifications and certificate revocations.

Implementation Service

Our team of experienced engineers can help you with the installation and configuration of your PKI. This includes setting up Certificate Authority configuration, search directory for public certificates, and certificates revocation service amongst others.

Maintenance Service

We provide different levels of maintenance service to meet your needs. From patches to upgrades, they are all performed by our team of certified engineers.

Other Valued Propositions

To enhance the security of your information systems, we have a wide array of PKI-enabled solutions, such as Digital Envelope and S/MIME that can be integrated with your existing information systems to minimise security risks and ensure secure data transmission during information processing.

Multi-Vendors Support

We are able to offer you the flexibility to choose your preferred vendor or recommend the best vendor that can meet your needs, so that your PKI implementation can be completed on time and on budget.
